

REPORT - LAB 1 (16/2/2023) "Introduction to Linux and Python"

Due data: Recommended 20/2/2023 (next session) – deadline 23/2/2023 (1 week)

As a report of the practical session, please report/do the following:

- 1) List the most important Linux commands used today.
- 2) Modify one of the python programs used today. All of them are available at:

https://github.com/jfaraudo/Python_examples

The modification can be an improvement of some aspect or a change in the calculation or a different calculation. Explain very briefly the change or improvement you made and add a screenshot/image capture showing what the program does.

- 3) Upload to the "Virtual Campus" both your report and the modified python program. If you have a "GitHub" user or equivalent, you can post only the report at the Virtual Campus and post your program at a new repository at your GitHub.
